**\*WIFI** — The user's device need connect to a dedicated Wi-Fi signal from the controller (separate from home or public networks). Through the app, users can remotely select programs and adjust color settings with ease.

**\*NOLA Control System** — A solution that lets one master controller synchronize multiple controllers and lights within a 1.5-mile range wirelessly, perfect for multi-location projects.

**\*Cloud** — Users can select programs anywhere in the world.

### CLOUD + NOLA
